IMPORTANT: Please read all instructions before use.

Instructions:

Before using your meat grinder for the first time, it is important to wash off all of the internal parts of the grinding head unit to remove the protective lubricant coating. This should be done with a strong detergent in hot water. Dry immediately. After each use, always wash the grinder head components and dry carefully. Then coat the parts with an FDA-Approved spray or non-stick coating spray such as a silicone lubricating grease.

Don't forget...The Sausage Maker is your source for everything you need to make sausage! Find everything from casings and seasonings to sausage stuffers and smokehouses. Have questions about sausage making? Our product specialists can help answer them for you!
